Education

Bachelor of Science in Computer Science Graduated: May 2026
Minor in Mathematics
University of Arkansas - Fayetteville

Technical Skills

- Programming languages: Python, C/C++, Java, JavaScript
- Frameworks and Libraries: GraphQL, Pytest, SQL, OpenGL, Selenium, Docker
- Development Tools: Claude Code, git, GitHub Copilot, Postman

Work Experience

Software Application Developer Intern, Centene (Remote) May 2024 – August 2025
- Contributed to a production codebase by refactoring code and supporting sprint deliverables
- Participated in Agile stand-ups and code reviews alongside the development team
- Delivered two signature projects (API validation and automated monitoring system) - detailed below

Coding Instructor, TheCoderSchool (Chesterfield, MO) August 2026 - Present
- Instruct students 1-on-2 in programming fundamentals, using Scratch and Python
- Design and deliver game-based curriculum to teach core programming concepts
- Adaptive to students' skills and learning styles across a range of ages

Software Projects

Donor Platform Application – Nonprofit Work August 2026 - Present
- Building a system to store donation info, handle payments, automate emails and generate reports
- Tech stack of Django, HTML + CSS, and PostgreSQL
- Collaborated with Claude throughout development
- In talks with the organization's board to move the system toward implementation

Automated Monitoring System Project – Centene Signature Project May 2025 - July 2025
- Overhauled an existing member usage monitoring system to resolve exposed credential vulnerabilities and reduce unnecessary complexity
- Containerized the solution with Docker and added hourly automated email and Teams notifications
- Used Selenium to automate data scraping from a monitoring site

Testing and Validation Project – Centene Signature Project June 2024 - August 2024
- Validated new GraphQL API against legacy API, using Pytest, and Postman
- Identified unexpected data mismatches, uncovering missing data fields in the new API
- Benchmarked member data fetch speed across both APIs, identifying speed increases

Senior Project – Online Scheduler August 2025 - May 2026
- Designed and implemented a full stack online scheduling application for university electronics Lab
- Part of the backend and database design team using FastAPI and MySQL
- Took lead in weekly communication with sponsor

Fluid Simulation Project February 2025 - May 2025
- Individually created a simple fluid simulation using the Navier Stokes equation
- Major project in a scientific computations class simulating research positions

Extracurriculars

College Hockey – University of Arkansas Men's Hockey Club 2022 - 2025
- Competed at a collegiate level on the Universities Men's hockey team

Volunteer Experience

Teaching Elementary Kids Programming/Hockey 2022 - 2026
- Every Semester in college I spent a week at local elementaries to teach coding and hockey
- Gained experiencing teaching non technical people about technical concepts
